

UPDATE 2023

Dear Alectown, Peak Hill, Baldry, and Parkes Community Members,

Over the last few years, we have been surveying biodiversity and studying the project's potential electricity network connection. Due to initial biodiversity survey results and current network limitations, we cannot see a pathway for the project to be of sufficient size for it to be competitive. As a result, we are not currently progressing the project.

We may resume work on Alectown Wind Farm in future, if there are improvements in the network and the project's competitiveness while ensuring minimal impact on biodiversity. Thank you for the support we have received from the community members. Please do not hesitate to reach out to us on email contact@alectownwindfarm.com.au or on phone 1800 966 188 if you have any questions
